Here's a powerful data solution for your business.

And a \$1000 rebate on a Cisco Router, too.

FRQ102-1

You know your data connection is critical.
you can't waste a second.
providers come and go.

Now,

how much do you know about Verizon?

Verizon has the solution to move your business ahead.

When there's no alternative to keeping your business up, running and ready, there's Verizon data solutions. For full-strength, integrated communications you can count on now and in the future. For high-speed Internet access over one of today's strongest networks. And for the help and support you need to make it all a perfect fit.

Verizon high-speed data solutions.

Network uptime increases. Profitability comes into focus. And your data and Internet infrastructure get challenged once again.

You know the drill. With more applications, more day-to-day business resources on the Internet and more customers online, there's more risk of a performance shortfall. And so much riding on the quality of your Internet and data connections.

Could be a problem. Or could be an opportunity.

The World-Class Network® for your high-priority data and business applications.

Verizon high-speed data solutions are built upon a solid, proven communications infrastructure — and lend confidence to every step your business takes. You can count on one of the world's strongest networks, complete with built-in backup systems and redundancy, plus 24/7 uptime guarantees, monitoring and full technical support. And you can look to us for the resources and experience you need to set a sure, steady course toward your communications goals — here and now, or long into the future.

High-speed frame relay and dedicated Internet access — the right connection at the right time.

From DSL to Channelized T-1 to ATM, Verizon has a range of speeds and solutions to make your network whatever you want it to be. And if that means optimizing your Internet access and data transport capabilities, the best choice could be a frame relay connection.

High-speed frame relay offers a constant, high-grade connection that bursts your data through high-volume periods. And with dedicated access, there's a 99.9% service level agreement to prove it. Online applications and Internet resources respond faster. Your workstations work better. And your business has the support it needs to explore, expand and get more done.

The integrated data solution for business that's here to stay.

Sustain growth. Diversify. Minimize risk. Whatever your long-term business goals, Verizon has the network reliability, cost-efficiency and operational performance to help you create and support the right data solution for your business. And you can be sure we'll help you see it through.

© 2002 Verizon. All Rights Reserved. Dedicated Internet service provided by Verizon Online and offer available to new business customers only who sign up for Internet access and frame relay service by 03/31/2002. Early termination fees apply, including equipment fee equal to remaining balance owing on router. Cost of router (retail value \$1600 – \$3300) to be spread over minimum two-year term commitment only with no service charge. Rebate redeemed through Verizon Reward Center. Instructions for claiming rebate will be mailed in a separate letter within three weeks after dedicated Internet access and transport service is provisioned. Services not available to all areas or locations and is subject to circuit availability. Monthly price includes separate Global Service Provider fees, where applicable. Additional fees may apply. All terms are subject to change.

Get a Cisco Router with a \$1000 rebate and no upfront costs.

When you sign up for Verizon frame relay and a two-year term for dedicated Internet access before 3/31/02.

Talk to a Verizon representative to find out about all the data solutions for your business.
